DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a digital camera that can record a motion picture and a still picture, classified in class 348, subclass 220.1.
 - II. Claim 13, drawn to a digital camera which includes an audio input/storage unit and an interface unit which outputs the audio data, classified in class 348, subclass 231.4.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention as claimed in group I has separate utility such as in a digital camera which does not include an audio input/storage unit which inputs audio data and records audio data, and an interface unit which outputs the audio data to the outside as claimed in Group II. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2612

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
